ADB Information Security Policy (summary)

ADB defines and establishes guidelines and procedures for safeguarding the confidentiality, integrity, and availability of all information assets, as well as to ensure compliance with relevant laws, regulations, and industry standards. ADB aims to maintain the trust of ADB customers, partners and stakeholders.

Each person in the organization has an appropriately defined role, which makes it easier to maintain the flow of information in accordance with their internal classification.

To ensure the security of customer data and our own, ADB ensures keeping up with current security trends through their practical implementation within the infrastructure.

Accordingly, ADB provides:

- Access Control
- Data Encryption
- Malware Protection
- Physical Security
- Incident Reporting
- Regular Training and Awareness
- GDPR compliance
